Download and Installation/Activation
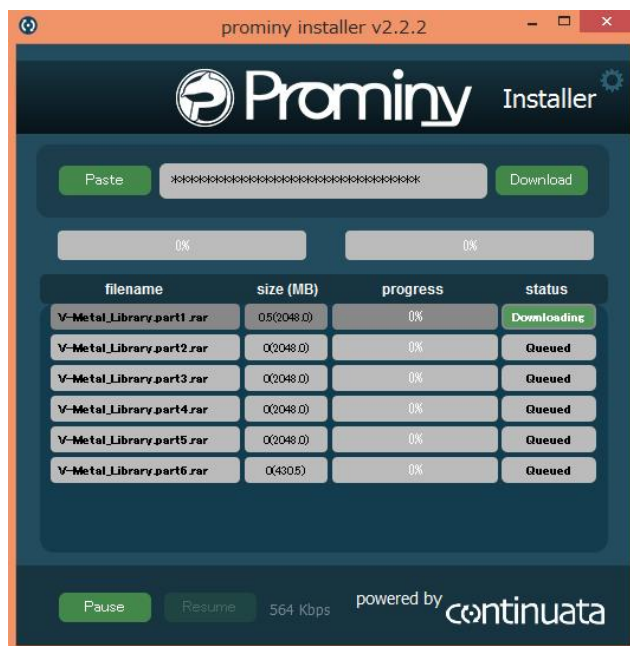

Download library files

Download Continuata Connect Download utility at;

http://continuata.net/download_app.php

Click the icon for your OS.

Once you've downloaded and installed the Connect utility, run it and then input your Download Code into the download code box.

Press the Download button and select the folder you want to download to. (The Prominy logo and download files are shown after pressing the Download button.) Please allow the Continuata Connect Download utility to download all the files before moving any files.

Download Naive Access and Kontakt Player

('Made for Kontakt Player' / 'Powered by Kontakt' products only*)

* If your product is LPC or PCP-80, skip this section and go to the section;
[LPC and PCP-80 (non-'Made for Kontakt Player' / 'Powered by Kontakt' products)](#)

Download and install the latest version of Native Access at;
https://www.native-instruments.com/en/specials/native-access/

After installing Native Access, launch it and log-in with your Native ID account (NI account) If you don't have an NI account, click the 'Create a Native ID account'.)

Click the 'Not Installed' and install Kontakt Player (or Kontakt). If Kontakt Player has already been installed on your computer, click the 'Available updates' and update Kontakt Player to the latest version.

Product Activation / Add Library ('Powered by Kontakt' products only*)

Click the 'Add a serial' and input your serial number and click the 'ADD SERIAL' button.

Click the 'Not installed', and the product is displayed on the list. Click the 'ADD LIBRARY' under the product name (or on the right of the product name if another display option is selected)

Click 'BROWSE' and select the library installation folder, and then click the 'INSTALL' button. Please be sure the Library folder itself (the folder that its name includes the product name), not the parent folder of the library folder.

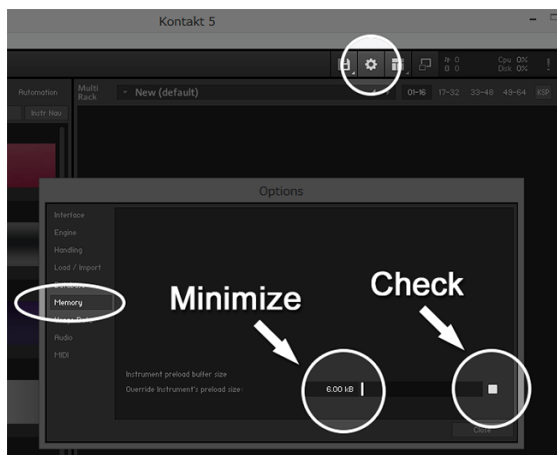

Launch Kontakt Player, and the product will appears in the Libraries Tab.

* The library tab (Kontakt's browser) can be shown / hidden by pressing F1 key of your computer key board.

[IMPORTANT] Preload buffer size configuration

Check your preload buffer size in Kontakt / Kontakt Player before loading the multi / instrument. The default pre-load buffer size is very large so samples are streamed safely, but it is too large. In most cases, samples can be streamed smoothly with a much smaller preload buffer size. By decreasing the preload buffer size, loading time becomes much shorter and you can save a big RAM space. As this product is a very big instrument that loads a large number of samples, the preload buffer size needs to be properly configured in Kontakt's option.

1. Click the Options button;

and click the 'Memory' tab.

2. Check the box (so it becomes white) and minimize; 'Override Instrument's preload size' (6kB).

We recommend you to start with the minimum; 6kb. If the samples are not played smoothly, try 12kb. If the sample streaming is still not smooth with 12kb, increase the buffer size as needed unless RAM runs out. It depends on the system, but in most cases 12 kb should work fine.

If you get a noise at the beginning of the note when you play a big multi...

A big multi that includes many instruments requires a certain amount of processing power. If you get a noise at the beginning of the note, *increase* the latency size of your audio interface (not 'decrease', unlike with the preload buffer size in Kontakt Option). For detail about changing the latency size, please refer to your audio interface manual.

LPC and PCP-80 (non-'Made for Kontakt Player' / 'Powered by Kontakt' products)
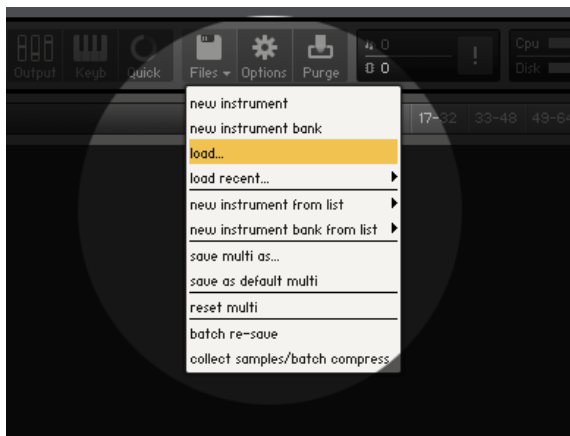

LPC and PCP-80 require the full version of 'Kontakt'. 'Kontakt Player' is not compatible with the products (they can be loaded only as 'demo' mode though) because Kontakt Player can load only 'Kontakt Player-based' libraries (= 'Made for Kontakt Player' / 'Powered by Kontakt' products) that are encoded only for 'Kontakt Player', such as;

https://prominy.com/products/hummingbird/
https://prominy.com/products/v-metal/
https://prominy.com/products/sr5-rock-bass-2/
https://prominy.com/products/sc-electric-guitar/

Only Kontakt Player-based libraries are shown in the Libraries Tab of the browser. (This is Kontakt's specification.) As LPC and PCP-80 are not Kontakt Player-based libraries, they are not shown in the Libraries Tab. (LPC and PCP-80 are sample libraries for the full version of Kontakt.)
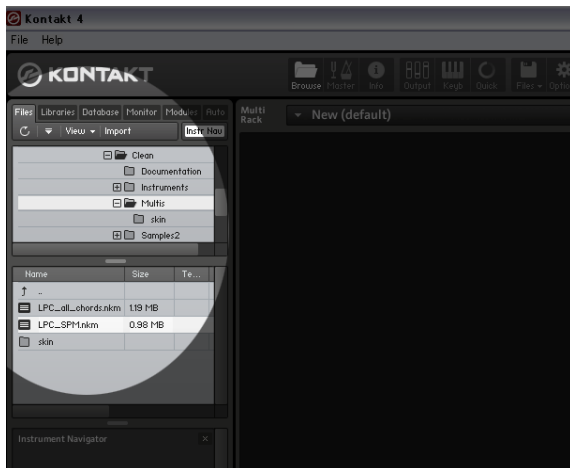

Also, as LPC and PCP-80 are not Kontakt Player-based libraries, they don't require authorizations. (Only Kontakt Player-based libraries require authorizations.)

How to load .nkm / .nki

- Using Kontatk's File menu

Click the Files icon and select the 'load...' and select the .nki / .nkm file you would like to load.

- Using Kontatk's browser

Click the Files tab of Kontakt's browser and select the .nki / .nkm file you would like to load.

Make a backup of your products

You don't have to re-download the product when you re-install it. If you have a backup, you can save a lot of time.

After downloading / installing your products, please make a backup for future installations (in case of a hard drive crash, installing on a new computer, initializing your computer, etc.). Copy the library folder (see below) to an external hard drive, USB memory, SD card or your network drive so you can use the products immediately just by coping them to your computer from the backup and do the ADD LIBRARY in Native Access. You don't need to wait for re-downloading the dozens of GB data.

How to make a backup
Just copy the following folder(s) to an external hard drive, USB memory, SD card or your network drive. an external hard drive, USB memory, SD card or network drive.

Hummingbird: 'Hummingbird'
V-METAL: 'V-Metal Library'
SR5 Rock Bass 2: 'SR5 Rock Bass 2'
SR5 Rock Bass: 'SR5 Rock Bass'
SC Electric Guitar: 'SC Electric Guitar Library'
ELECTRIC GRAND PCP-80: 'PCP-80'
LPC Clean Guitar: 'LPC_Clean'
LPC Distortion Guitar: 'LPC_Distortion'

* Only Kontakt Player-based libraries are required authorizations. As LPC and PCP-80 are not Kontakt Player-based libraries, they don't require an authorization / ADD LIBRARY.

Re-issuing a new download code may cost you a fee depending on the situation. (for details about getting a new download code, please read the 'Download code' section of the [License agreement page](#)) Please make a backup and manage your library data by yourself so you will not lose it.
